Peru, LATAM | Open to Remote Opportunities

Professional Summary

Senior Software Engineer with nearly 7 years of experience building full-stack applications, scalable APIs, distributed systems, and cloud-native solutions.

Strong backend foundation with hands-on experience across the full application stack, working with **TypeScript, JavaScript, Node.js, Python, React, AWS, PostgreSQL, and MySQL**.

Currently working as a Technical Lead, leading engineering teams and contributing to architecture, application design, and technical decisions for business-critical platforms. Experienced in leading up to **15 developers**, overseeing ecosystems of **200+ APIs and services**, supporting platforms serving **20K+ concurrent users**, and reducing incident handling time by approximately **60%**.

Strong background in software architecture, API design, frontend-backend integration, cloud infrastructure, code quality, production reliability, and technical leadership.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, JavaScript, TypeScript, Responsive Web Applications

Backend: Node.js, Python, REST APIs, Microservices, Serverless Architecture, Event-Driven Architecture

Databases: PostgreSQL, MySQL

Cloud & Infrastructure: AWS, AWS Lambda, Serverless Framework, Docker, Kubernetes, Amazon EKS, Azure Kubernetes Service (AKS)

Engineering: Full-Stack Development, System Design, API Design, Distributed Systems, CI/CD, Software Architecture, Code Review, Production Reliability

Leadership: Technical Leadership, Engineering Mentoring, Architecture Reviews, Cross-functional Collaboration, Incident Management

Professional Experience

Technical Lead | RIMAC Seguros y Reaseguros

May 2025 - Present | Lima, Peru

- Lead the technical delivery of business-critical insurance and wellness platforms across multiple engineering initiatives.
- Lead and provide technical direction to a team of up to **15 software developers**, supporting architecture, implementation, and engineering decisions.
- Oversee an ecosystem of **200+ APIs and backend services**, ensuring scalability, maintainability, and production readiness.
- Review system architecture, technical designs, and code to maintain engineering standards across teams.
- Support high-traffic platforms handling **20K+ concurrent users during peak campaigns**.
- Helped reduce incident handling time by approximately **60%** through improved technical processes, observability, and engineering practices.
- Collaborate closely with Product, QA, Marketing, and business stakeholders to translate business requirements into scalable technical solutions.
- Drive technical discussions around backend architecture, APIs, cloud infrastructure, performance, and reliability.

Backend Developer Expert | RIMAC Seguros y Reaseguros

October 2023 - May 2025 | Lima, Peru

- Designed and developed scalable backend services and APIs using **TypeScript, Node.js, AWS Lambda, and Serverless Framework**.
- Built and maintained APIs supporting business-critical insurance and digital platforms.
- Worked with **PostgreSQL and MySQL** for transactional and business-critical workloads.
- Designed solutions using **serverless and event-driven architectures** to improve scalability and system decoupling.
- Improved API performance, reducing response times to approximately **2 seconds** for key information services.

- Participated in architecture discussions, code reviews, troubleshooting, and production incident resolution.
- Collaborated with frontend, QA, product, and business teams throughout the software delivery lifecycle.

Backend Developer Sr. | Tata Consultancy Services

September 2022 - September 2023 | Peru

- Developed and maintained **full-stack enterprise applications** using JavaScript/TypeScript, Node.js, Python, and React.
- Built REST APIs, backend services, and integrations for business-critical workflows.
- Developed and integrated **React-based frontend features** with backend services and enterprise systems.
- Worked across frontend and backend layers to deliver end-to-end application features.
- Participated in code reviews, debugging, production support, and technical discussions within distributed engineering teams.

Backend Developer | Copstone

September 2020 - September 2022 | Peru

- Developed **full-stack web applications** using React, JavaScript/TypeScript, Node.js, and Python.
- Built REST APIs, backend services, business logic, and integrations with relational databases and third-party services.
- Developed and maintained frontend interfaces using **React**, integrating them with backend APIs and business workflows.
- Contributed throughout the application lifecycle, including design, development, testing, deployment, and maintenance.
- Collaborated with engineering teams and stakeholders to deliver features end-to-end.

Web Developer | Freelance IT Services

January 2020 - July 2022 | Peru

- Designed and developed **end-to-end web applications** for independent clients and small businesses.
- Built responsive frontend applications using **React and JavaScript/TypeScript**, alongside backend services using Node.js and Python.
- Developed REST APIs, database integrations, business logic, and third-party integrations.

- Delivered complete features across frontend, backend, and database layers based on client requirements.
 - Managed projects from requirements gathering and technical design through implementation and deployment.
-

Earlier Experience

Sales Team Lead | Grupo Intercorp

November 2015 - December 2019 | Peru

- Led sales teams and coordinated day-to-day operations in a customer-facing environment.
 - Developed early experience in team leadership, communication, performance management, and business operations.
-

Languages

Spanish: Native or Bilingual

Portuguese: Full Professional Proficiency

English: Professional Working Proficiency

Certifications

- Agile Software Development
- IT Essentials
